

SURVEY

SecureGas crisis communication

[NEW] Deadline to fill in the survey: 14th of June

A master thesis at the university of Vienna, department for risk prevention and disaster management, addresses the topic of resilient communication and information sharing in case of disruptions to gas critical infrastructure networks. The author has developed a survey (Communication and information sharing in case of disruptions to gas critical infrastructure networks) aiming to get information from SecureGas partner, SecureGas Stakeholder, relevant governmental responsibilities in crisis management and emergency services. The (anonymous) answers will directly contribute to the need-based development of crisis communication in SecureGas project.

We would kindly appreciate if you could answer the questionnaire and share it with colleagues in that field.

Here is the link to the survey:

<https://www03.surveymonkey.com/public/online/index?QN9S/secure>.

The survey will be open until June 14th latest.

Thank you for your support.
